

### **INTERPRETATION OF THORACIC RADIOGRAPHS; AN OVERVIEW**

#### **Interactive case interpretation of thoracic radiographs**

Interpretation of thoracic radiographs is a challenge to most veterinarians. In 45 minutes this lecture will provide you a structured, step by step approach that can help you in daily practice. Normal anatomy and pathology of thoracic structures will be discussed, with special interest for the cardiovascular structures and pulmonary patterns. After the break the challenge is yours! Several thoracic cases will be discussed interactively.

Kim van Schaik-Gerritsen,  
Dipl. ECVDI
